This game gets hard fast. Well at least for me it did. But you just keep on sparking spaceman! Seriously i enjoy the music and simple graphics of the game.. A very pretty otome with awesome character animation and music. I really enjoyed the world it takes place in and hope to see it expanded on in a future installment. Definitely worth it for the price.

I didn't encounter any of the bugs people mentioned in previous reviews.. Game of the year. Well, I consider it as very good purchase. Had fun for few hours, and paid only 1€. Pretty nice 9/10, would buy again..

👍 👍 🎮🎮🎮🎮 🎮🎮 🎮🎮🎮🎮. This "game" has everything

20 FPS

Low Graphics

No Servers

And last but not least, the horrible gameplay

luckily i didn't pay for this game. Great Stealth game. But the AI is kinda dumb and 200 IQ.. Kingspray Graffiti was a great help for me to practice real life graffiti. The realistic drips and pressure, made it the ideal game for both hardcore painters and newcomers. What I especially love, is the camera feature. Moving around all cinematic. You will be able to film your experience from 9 different angles, while also being able to see the camera through the goggles.

10/10 <3. Another VN Game About well Painting Now I think people That wanna have an Artistic Feel to something is nice. The MC you Helps these 3 Girls creating Mars Painting And Beginning theres Little to no effort done on there part but slowly Becomes Better as time goes on.

Nacchan Pink Haird Girl Wants to become Manga Artist she loves to draw and sketch too

Estelle Girl with Whatever Attitude She just likes to Do Whatever she wants and shes the Go too girl with Meh Problem.

Dawn is shy And also she Accels in her Painting skills Let alone other....things haha. I do Recc This Game to Anyone if you love Painting.. The game simple dont work anymore when I try to get other then the default graphics. Stay away.

Ruhr Sieg is long and has some dense beautiful landscape along with some highly detailed towns. Many have complained about the bugs but they are mainly cosmetic and don't at all affect the drive. I like it very much. The scenarios are ok for the most part. The night missions are bland because the towns in this route hardly light up at all. There is literally nothing to see. Other than that I like it very much. Some of the locos leave a lot to be desired but I like one of electric ones offered and the BR52 steam loco.. All in all you can't go wrong for such a cheap price.. This game is awesome, if you love TD games you'll definitely like this game

there are 2 only downsides of this game

1. The UI is very very simple in all aspects (info, sfx, graphics, animation)
2. It's taking too much time and too much concentration, and if you die you'll have to repeat the whole level (it can take more than 1 hour for hard difficulty in later levels)

Other than those it's all good, gameplay is quite unique, nice story. I. Love. This. Game.

It's one of the few games that can truly be called "eerie" - it's not a "horror" game, but it's gentle pace has fear riddled throughout. It's difficult enough to have you trying again and again to reach that final destination.

Screwfly has made a ton of great games (Zafefhouse Diaries is fantastic), and this game is no exception to that... dare I say it... train. :) All I can hope is that this wonderful studio gets more and more recognition as time goes on! Thanks, Screwfly!. I have read many, many stories, and played a lot of games, and in doing so I have become used all kinds of "surprise endings" and "plot twists", so finding this gae, which not only surprised me with it's twists, but was also fun to play, was a treat. The fact that this game is a commentary on some "taboo" subjects, and shows those subjects so clearly is amazing, especially since some of the developers went through those situations. I loved the game and what it shows and I would like to thank the developers for making this game, although I am truly very sorry for what inspired it.. What a nice surprise! All the major Lucarts graphic adventure games have been released, except this. Until now. It would have been nice to get a remake like Day of the Tentacle, but this is good enough. And it comes with both C64 and Amiga(Enhanced) versions.
